

### Advanced Treatment Options For Every Smile

"My friends tell me how much younger I look and I can't stop smiling! Dr. Ajmo is an artist."

Ida had old dental work that had deteriorated over time. She wanted a youthful, bright smile to complement her face.

**Treatment:** Complete dental restoration with cosmetic porcelain crowns.

"I get compliments all the time. My teeth are real, and they look great. I highly recommend Dr. Ajmo to everyone."

George had unsightly yellow teeth and had lost several teeth due to decay. He wanted a clean, healthy smile that looked natural.

**Treatment:** Complete dental reconstruction with dental implants and cosmetic porcelain crowns.

"My friends tell me that my new smile lights up my face. I'm so glad I found Dr. Ajmo and PGA Dental."

Pat was unhappy with her crooked, yellow teeth. She wanted a straight, white smile that enhanced her self-confidence.

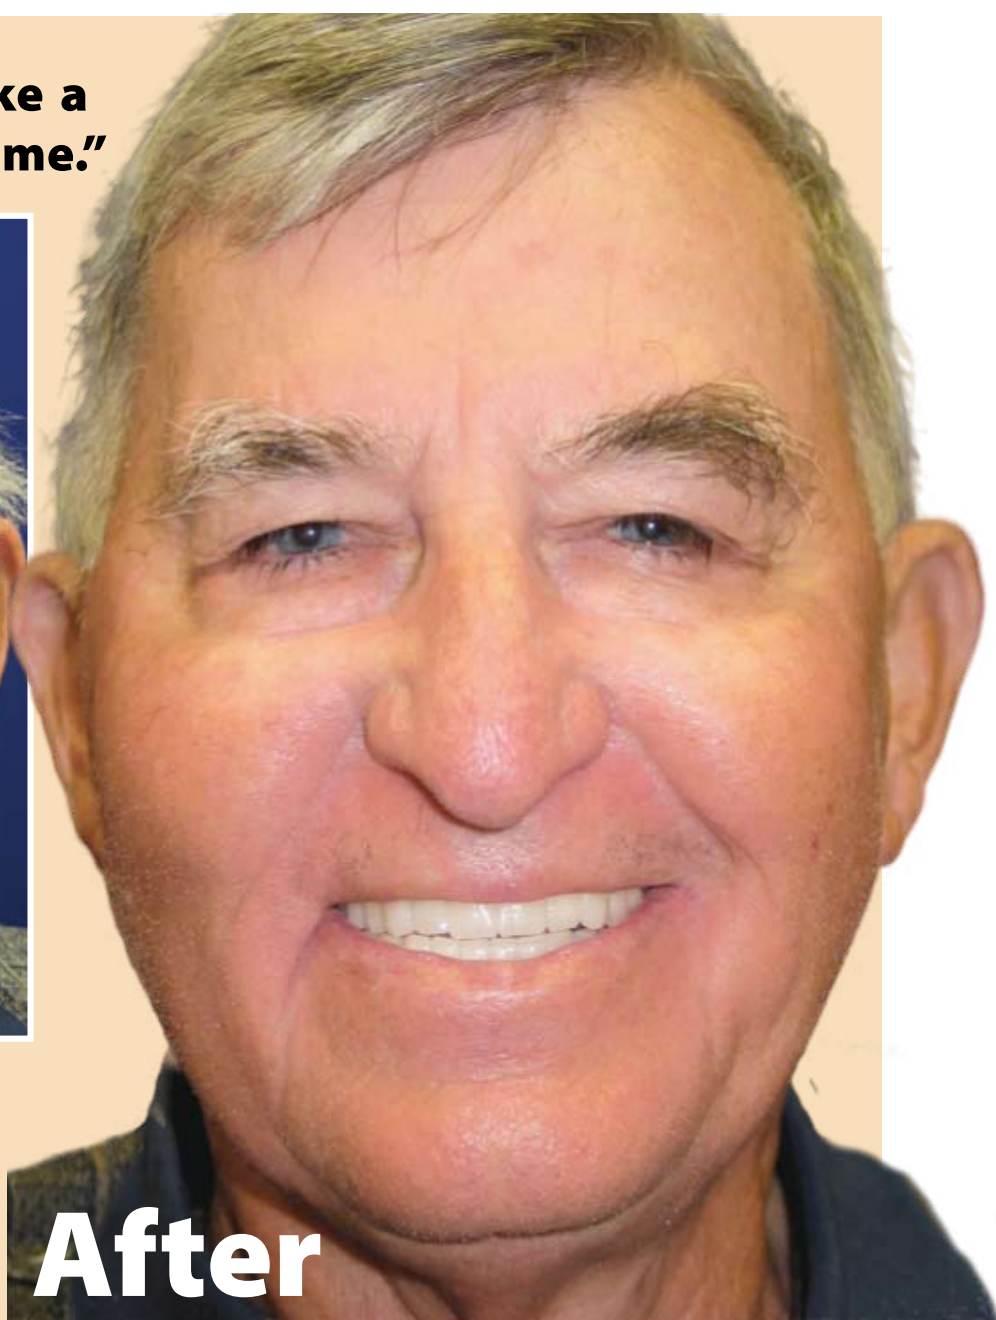

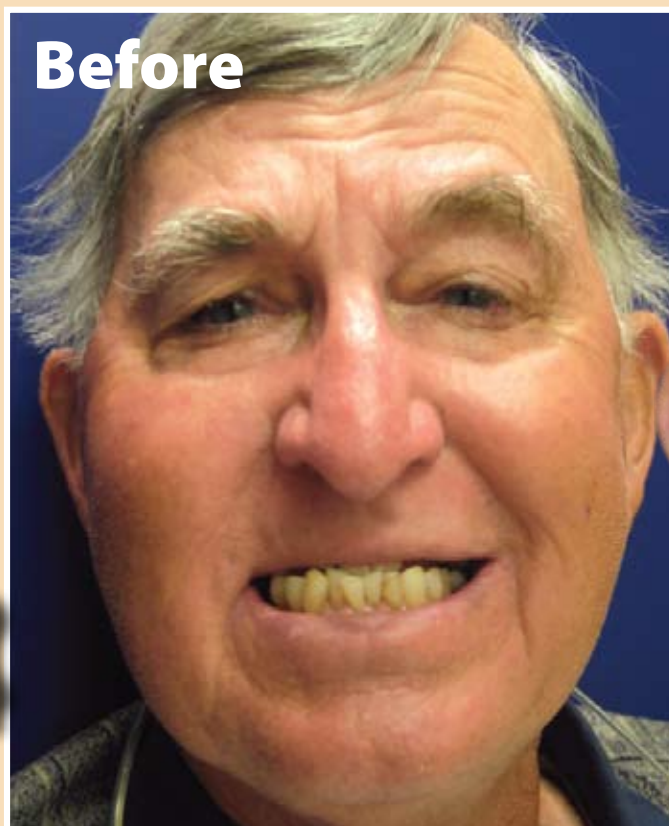

**Treatment:** Smile makeover with cosmetic porcelain veneers.

**"Everyone says I look great, and I feel like a new man! Thank you so much for helping me!"**

# Ageless Smiles

A leading-edge practice is reversing the aging process with restorative, cosmetic, and implant dentistry using the comfort of mild oral sedation.

PGA Dental Associates

Cosmetic, Restorative & Implant Dentistry

Jay L. Ajmo, DDS, P.A.

"I kind of looked like a bulldog all of the time," admits Bill Glazier. "I had a severe underbite and my teeth were really bad. I didn't realize it at first, but I was also having trouble chewing my food properly."

Bill, a part-time resident of the Palm Beach area, had been to PGA Dental Associates for teeth cleanings and checkups in the past. Bill says that knew he had dental problems and had been considering cosmetic solutions. It wasn't until a front tooth became loose at his summer home in Syracuse, however, that Bill thought to seek out PGA Dental again and the expertise of Jay L. Ajmo, DDS, P.A.

Dr. Ajmo's areas of expertise are in complete dental restoration, dental implants, and cosmetic smile design. He has been offering leading-edge

procedures in his Palm Beach Gardens office since 1987.

"Dr. Ajmo explained to me, while I've always had trouble with my teeth because of my bite, he could correct all of that and give me a full mouth of permanent teeth that would probably last the rest of my life," Bill recalls. "I'd be able to chew my food properly and I would look and feel a lot healthier. I liked the sound of that and I really felt confident with Dr. Ajmo and his staff."

#### The right approach

"Many of our patients come in with darkened or yellowed teeth that show signs of wear, cracking, or chipping," Dr. Ajmo notes. "These obvious aging signs, combined with the unsightly look of dated dentistry, can result in smiles that are dull and lack vitality.

completely natural looking solution for dental health and vitality.

"Dental implants are the newest option for permanently replacing one or more missing teeth," explains the doctor. "Surgically placed below the gum line, dental implants fuse to the jawbone, serving as a solid, secure foundation for porcelain crowns, permanent bridgework, or dentures.

"Implants allow you to speak, eat, and smile again with comfort and confidence because they look, feel, and function like natural, healthy teeth."

One of the advantages of dental implants, says Dr. Ajmo, is that they restore form and structure to the face, correcting the prematurely aged appearance from missing teeth and bone loss.

Dental implants were also part of the solution for Bill Glazier's loose and missing teeth, providing the foundation for his new, healthy smile.

"With today's technology and the proven success of dental implants, we can restore teeth for function, aesthetics, and overall well-being that will often last a lifetime," Dr. Ajmo asserts. "It's not just giving patients a beautiful smile and making someone look so much younger; it's about helping them live their lives to the fullest."

#### Every advantage

Patients of Dr. Ajmo enjoy a rejuvenating experience in more ways than one at PGA Dental. The staff of PGA Dental believe that an important part of providing patients with the most advanced and professional dental care includes pampering them so they're relaxed and comfortable during their dental visits.

The beautifully designed PGA Dental office features all the comforts of a spa, including a relaxing aromatherapy room, massage chairs, neck pillows, and a selection of music with noise-canceling headphones.

"If a patient has avoided the dentist or experiences anxiety about dental care, we offer them mild sedation during treatment," says Dr. Ajmo. "Our patients' comfort and needs are always a number one priority."

Dr. Ajmo says that the goal of PGA Dental is to give each patient a uniquely satisfying experience, both personally and professionally, while offering them every advantage in their treatment options.

"We make many of our patients look and feel years younger," he adds, "and they are amazed by the positive changes we create. They appreciate our unparalleled service and often tell us how grateful they are for what we've accomplished for them. They always refer their family and friends to us, and that's the greatest compliment we can receive."

FICM—Rachelle L. Wilson

"An unattractive smile makes the entire face look older and less vibrant. Creating healthy, natural smiles is truly a fusion of advanced training, artistry, and expertise.

"For each individual patient, we thoroughly evaluate the shape, size, and alignment of their teeth, as well as their lips, gum tissue, and facial features so that we can offer them a final result that looks natural and feels comfortable.

"Teeth can be lengthened, straightened, or repositioned, and gaps can be closed," Dr. Ajmo continues. "Older, unattractive dental work can be replaced using state-of-the-art materials and techniques. We use only the strongest, most natural looking porcelains, prepared at the finest dental labs available. The result is an absolutely beautiful, healthy smile that will last for many years."

For Bill Glazier, Dr. Ajmo created a brilliant smile and a naturally aligned bite for a functional and cosmetic restoration that rejuvenates his entire face.

"We utilized a combination of dental implants, porcelain crowns, and permanent porcelain bridgework to restore his bite and give him the ability to chew properly," Dr. Ajmo reports. "Correcting Bill's bite and restoring his teeth also improved his speech and, as you can see, it took years off his face, rejuvenating his whole appearance."

"I've gotten so many compliments," confirms Bill. "Everyone has commented on the improvement and my wife is very happy with it. It's definitely changed things for me and given me a lot more self-confidence. I feel ten years younger!"

#### Sophisticated options

Dr. Ajmo is one of very few dentists trained and skilled in both the surgical placement and comprehensive restoration of dental implants. A Fellow of the International Congress of Oral Implantologists, Dr. Ajmo has extensive experience with implant dentistry, a highly successful, durable, and

Jay L. Ajmo, DDS, is a fellow of the International Congress of Oral Implantologists. After receiving his Doctor of Dental Surgery degree from Emory University School of Dentistry, he received additional training in minor oral surgery at Grady Memorial Hospital in Atlanta, GA. Dr. Ajmo's areas of focus are in Complete Dental Reconstruction, Dental Implant Restoration, and Aesthetic Smile Design. He has been awarded the prestigious Master's Level status by the renowned Rosenthal Institute for Aesthetic Dentistry, New York, NY, and was also chosen by *The Best of South Florida* as "South Florida's Most Distinguished Cosmetic Dentist."

### Stop premature aging with dental reconstruction!

As an individual ages, worn or missing teeth, along with bone loss in the jaw, result in a gradual "collapsing of the bite." Subsequently, the proportions of the lower half of the face shorten or deflate. The lips flatten in the front and droop down in the corners, with a puckering of the chin and a loss of volume to the lower half of the face. These obvious aging signs often result in an overall appearance that is old and tired.

Complete dental reconstruction involves the restoration of an individual's entire mouth, and may involve a combination of porcelain crowns, fixed porcelain bridgework, dental implants, or removable prostheses to create a rejuvenated, healthy smile and reverse the aging effects of a collapsing bite.

### Are dental implants right for you?

Dental implants are the strongest and most permanent option to replace one or more missing teeth. Surgically placed below the gums, implants fuse to the jawbone, serving as a solid, secure foundation for porcelain crowns, fixed porcelain bridgework, or streamlined dentures.

### BENEFITS OF DENTAL IMPLANTS:

Dental implants function and feel like natural teeth, allowing you to eat and speak comfortably.

Dental implants can be restored to look like natural teeth so you can smile with confidence.

Dental implants help maintain the bone structures of the jaws and face, preventing the premature aging process often associated with tooth and bone loss.

Dental implants firmly and securely support dental work, eliminating the need for bulky, plastic dentures, or adhesives.

Dental implants will usually last a lifetime.
