Creating Beautiful Smiles in the Comfort of a Spa

Imagine visiting your dentist and feeling like you're in a spa. That's right a spa! PGA Dental Spa, where discriminating Palm Beach residents receive some of the most advanced dental care available today. Their fabulous Palm Beach Gardens' office is designed with the look, feel, and smell of a spa. To ensure your comfort, Dr. Jay Ajmo and his team of friendly professionals will make your personal needs their number one priority. They offer aromatherapy, neck pillows, chenille blankets, XM stereo headphones, a massage chair, paraffin wax treatments, and highly personalized service to accommodate each individual. Mild sedation is also available to those who appreciate the added relaxation.

Dr. Ajmo has been providing advanced dental care to his upscale clientele in Palm Beach Gardens for over 17 years. His areas of expertise are in complete dental restoration, complex dental reconstruction, and aesthetic smile design. He has been awarded the prestigious Master's Level status by the renowned Rosenthal Institute for Aesthetic Dentistry in Manhattan, New York.

"Many of our clients are from the baby boomer generation," states Dr. Ajmo. "Oftentimes their teeth have darkened or yellowed, and show signs of wear, cracking or chipping. These obvious aging signs, combined with the unsightly look of dated dentistry make the entire face look older and less vibrant."

"Creating beautiful smiles is truly a fusion of advanced training, artistry and expertise," states Dr. Ajmo. Advanced cosmetic and restorative dentistry allows the exceptionally trained and skilled dentist to combine dramatic aesthetic enhancements with the restoration of broken down or worn teeth to create a more youthful and healthy smile. A beautiful smile can take years off your face while exuding more confidence and enthusiasm for living. "Our clients are always complimenting us on how special we make them feel and how happy they are with their new smiles," exclaims Dr. Ajmo. "We make them look and feel 10-15 years younger oftentimes in just 2 weeks."

Jay L. Ajmo, D.D.S., P.A.
